AVERAGE SNOWFALL BY PERCENTAGE

I will stick to Europe or Asia for a Budget Friendly resorts . France, Italy and Switzerland can be places of choice for that ski experience whilst South Korea, Japan and Turkey can be places in Asia to consider as well

On the average Prices tends to be high in the USA with the most expensive being \$141 . On the other-hand Prices tend to be less in Germany and France preferably between the December - March season and December - April season respectively.

There are cheaper resorts in the USA depending on your budget and some free-entry resorts to pick from.

France has the resorts with the most number of slopes .With Austria having the number of snow parks The United States has the priciest resorts of 110 and followed by Canada of 93 . Its interesting to know that prices at resorts can be influenced by countries so it would be to keep in mind.
